

What is the location of the project?

The bridge replacement project is located in the Henrico county east end Varina District.

Will pedestrian traffic be maintained?

Yes. The contractor will provide access for pedestrian traffic during the construction process.

When is the scheduled construction completion date?

Construction of the bridge has a scheduled completion date of late winter 2016.

Will detours be required?

Yes; detours are planned. Detours will take place during non-peak hours on Nine Mile Road. There will not be any detour on Interstate 64.

How much will the project cost?

The cost of construction is \$ 7.4 million.

Will the project take property?

There will be no additional right of way required.
