

# Storm drains and pollution

**Video:** *Fly fisherman in river*

**Video:** *Fisherman speaks to camera*

**Audio, music in background:** This river has been a big part of my life. Luckily, it's still clean. But things we do every day pollute our streams. It's up to all of us to help prevent stream pollution.

**Video:** *Man with used motor oil at car*

**Audio:** Things that we can do to help stop pollution include: Recycle used motor oil and fix leaky cars.

**Video:** *Man raking leaves around storm drain*

**Audio:** Keep yard waste like leaves and grass clippings out of the streets and prevent them from entering the storm drains.

**Video:** *Construction workers putting up plastic erosion barrier*

**Audio:** Prevent erosion on construction job sites.

**Video:** *Men planting trees on stream bank*

**Audio:** Plant trees along streams and waterways.

**Video:** *Storm drain sticker*

**Audio:** Participate in a storm drain stenciling program.

**Video:** *Volunteers cleaning up road*

**Audio:** Adopt a highway to help clean up litter from our roadways.

**Video:** *Fisherman talking to camera*

**Audio:** If you don't want to see it in the river, don't let it go down the storm drain.

**Video:** *Stream with graphic of Web sites*

**Audio, male narrator:** For more information on protecting our streams and waterways visit the Virginia Department of Conservation and Recreation's Web site at [dcr.virginia.gov](http://dcr.virginia.gov). For more information on the Adopt-a-Highway program visit the Virginia Department of Transportation's Web site at [virginiadot.org](http://virginiadot.org).
