## TRAFFIC SHIFT IN PLACE FOR LEWISTOWN ROAD BRIDGE REPLACEMENT PROJECT OVER I-95 IN HANOVER

*Drivers should follow new traffic patterns*

**Hanover** – The Lewistown Road bridge replacement project will reach another milestone early next week when traffic shifts to the completed half of the new bridge, so that work can begin on the remaining half of the bridge. The relocation of Airpark Road and the relocation of the I-95 north off ramp to Lewistown Road were the first two milestones for the project.

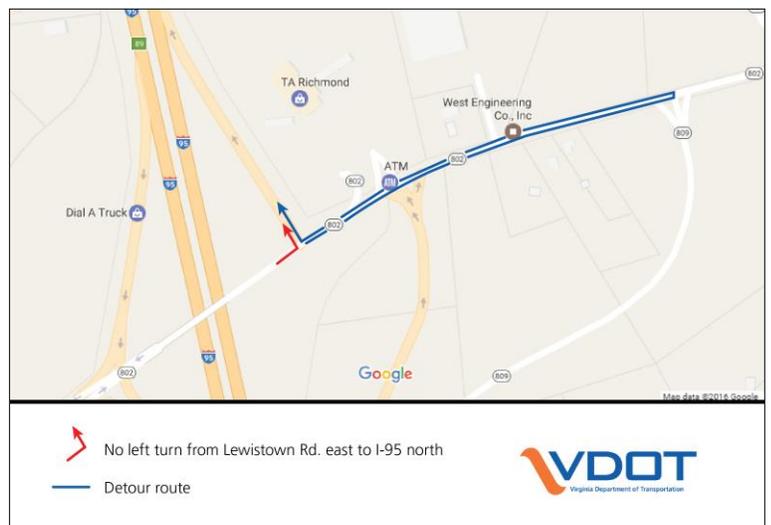

The traffic shift is expected to be in place by 2 p.m. Monday, December 19. As part of the new traffic pattern, left turns from Lewistown Road (Route 802) east to I-95 north and from I-95 south to Lewistown Road east will be restricted. The left turn lane restriction from Lewistown Road west to I-95 south is already in place. Drivers should follow the posted detours through July 2017.

Drivers should use the following detour routes:

- To access I-95 south - Take Lewistown Rd. (Rt. 802) west to Washington Hwy. (Rt. 1) north to N. Lakeridge Pkwy (Rt. 782) east to Lewistown Rd. (Rt. 802) east to I-95 south.
- To access I-95 north - Take Lewistown Rd. (Rt. 802) east to Airpark Rd. (Rt. 809) to Lewistown Rd. (Rt. 802) west to I-95 north.

More information on the Lewistown Road bridge reconstruction project is available at
