

## Virginia Beach

### Holland Road Connection

**Cost:** \$31 Million

**Current Status:** Under construction. Completion October 2017.

**About the Project:** This will increase capacity and safety along Holland Road and reduce travel delays by adding an additional lane in each direction. After construction, Holland Road will be a continuous four-lane divided roadway from Dam Neck Road to Nimmo Parkway. First, crews will improve the Holland Road/Dam Neck Road intersection. Next, they will start constructing the additional two lanes on Holland Road. It will happen in two stages. Crews will then improve the existing lanes.

### Lynnhaven Parkway Widening

**Cost:** \$18.9 Million

**Current Status:** New bridge and lane construction completed December 2016.

**About the Project:** This project constructed a four-lane divided roadway from Centerville Turnpike to Indian River Road. This is the final phase of the Lynnhaven Parkway projects and provides a north-south link between Virginia Beach and Chesapeake. Previously, this portion of Lynnhaven Parkway was primarily a two-lane road, with no connection from Indian River Road to Centerville Turnpike.
