INTRODUCTION

The 2003 edition of the Summary of Crash Data presents tabulated material relative to the crash experience on the Interstate, Primary, Secondary and Frontage Road highway systems throughout the Commonwealth of Virginia.

Crashes that occurred on roads that are maintained at local levels are not included in this publication other than in one table on page 7 labeled Crash Summary by Years - All Virginia Highways, Streets and Roads. Crash data obtained from The Virginia Department of Motor Vehicles.

This Summary of Crash Data contains data for those crashes involving death, personal injury or property damage (report not required for property damage crashes less than $1,000) reported by investigating officers.

Please be advised that, under Title 23 United States Code – Section 409, this crash information cannot be used in discovery or as evidence in a Federal or State court proceeding or considered for other purposes in any action for damages against VDOT or the State of Virginia arising from any occurrence at locations identified.

DEFINITION OF TERMS

Overlaps - where two or more routes are extended over the same section of road the information is presented on the route number in accordance with the maintenance log of the Department.

Kind of Highways -

Full Control of Access - preference is given to through-traffic by providing access connections with selected public roads only, and by prohibiting crossings at grade or direct private driveway connections.

Partial Control of Access - preference is given to through-traffic to a degree that, in addition to access connections with selected public roads, there may be some crossings at grade and some private driveway connections.

Two Lane - an undivided highway consisting of two lanes serving vehicles traveling in opposite directions.

Three Lane - an undivided highway consisting of three lanes serving vehicles traveling in opposite directions.

Four or Six Lane Undivided - a roadway consisting of four or six lanes to serve through-traffic without a physical separation of opposing traffic.

Divided - a roadway consisting of four, six, eight, or ten lanes with a physical separation of opposing traffic.

Miles of Road - represent the total miles in the State Highway Systems as of December 31, 2003.

Vehicle Miles - represents the vehicle miles of travel (VMT) on the State Highway Systems for the calendar year 2003. The daily vehicle miles of travel (DVMT) is obtained by multiplying the average annual daily traffic (AADT) by the roadway link length. Annual VMT (AVMT) is the DVMT multiplied by 365 days.

Fatal Crashes - those crashes in which one or more persons were killed as a result of the crash.

Persons Killed - the total persons killed in fatal crashes.

Injury Crashes - those crashes in which no one was killed but one or more persons sustained injuries due to the crashes.

Persons Injured - the total number of persons injured (non-fatal) in the fatal and injury crashes.

Property Damage Crashes - those crashes in which no one was killed or injured but where damage to vehicles or other property was incurred.

Property Damage - the total amount of property damage in dollars that occurred as a result of all fatal, injury and property damage crashes. This includes the damage to the vehicle and other property.

Total Crashes - the sum of all fatal, injury and property damage crashes.

Pedestrian - only those persons on foot or using non-motorized means of travel (eg. bicycle, skates, carts)

Frequency Rates - the crash, injury and death rates are calculated by dividing the total numbers of crashes, persons injured or persons killed by the annual vehicle miles of travel at a location. Rates are expressed per 100 million vehicle miles of travel.

Route ID - A unique 14 – digit/character identification for a road in the State Highway System. A Route ID is composed of a prefix, a route number, and a route suffix.

Route Prefix, in positions 1-4, is the highway system for the road. For Secondary Roads the prefix identifies the jurisdiction number listed on pages 5 and 6.

A - Alternate
B - Bypass
C - Commercial/Business
Y - Wye

IS - Interstate
US - U.S. Route
SR - State Route
FR - Frontage Road

Route Number, is in positions 5-9.

Route Suffix, in positions 10 –14, is primarily assigned for Interstates. Position 10 is the route direction. Positions 11-14 are for Ramp ID's that define the roadway the ramp it is exiting and the direction of travel. If the first position (10) is blank, then the ramp carries traffic from both travel directions. The next three positions contains the interchange number that is generally the milepost on the route (of exit). The last position (14) is the designated ramp letter.

P - Parallel Route
N - Northbound
E - Eastbound
S - Southbound
W - Westbound
R - Reversible

1 - Express Northbound
2 - Express Eastbound
3 - Express Southbound
4 - Express Westbound
5 - Express Reversible

Crash statistics obtained from The Virginia Department of Motor Vehicles.

Includes VDOT Maintained (Interstate, Primary, Secondary , and Urban) & Locally Maintained Roadways.

* **Annual vehicle miles of travel (AVMT) was developed using VDOT's Traffic Monitoring System, based on an extensive vehicle count program that covers all public roads in Virginia.**

Prior to 2001, the AVMT was estimated based on statewide motor fuel consumption.

CRASH SUMMARY BY HIGHWAY SYSTEMS

YEAR 2003

ROADS UNDER JURISDICTION OF VIRGINIA DEPARTMENT OF TRANSPORTATION

	INTERSTATE	PRIMARY	SECONDARY	ALL SYSTEM TOTALS
