

*ProjectWise Job Aid - Creating PDF of Sheets*

## Creating Renditions in ProjectWise for Current Drawings or Plan File Room

You must place a border on each of the sheets by placing the closed shape plot border as a cell. The border is what determines where the sheets will be cut. New sheets created after ProjectWise Migration already have this border.

**THESE FIELDS MUST BE FILLED OUT & CORRECT ON EVERY FILE in PROJECT PROPERTIES:**

**VDOT Route**  
**VDOT County-City Number**  
**VDOT Section**  
**VDOT C Number or M Number**

**VDOT Plan File Room Type**  
**VDOT District**  
**VDOT Sheet (Document Properties)**

1. Open your Sheet in Microstation.
2. To set the cell, select Place Active Cell and choose or key in DES\_PLANSHEET\_PLOTBO and set the correct scale depending on 25 or 50 scale plans.

3. Select the bottom left hand corner of the sheet to place the cell.
4. Check the file back in to ProjectWise.

## *ProjectWise Job Aid - Creating PDF of Sheets*

5. In ProjectWise, right click on the file and select Create Renditions.  
(for Plan File Room, skip to step 9)
6. For Current Drawings, fill out the box as shown below and click Submit.  
For Traffic Plans, change the Presentation to VDOT\_Traffic.

**Create Renditions**
