

### Concrete Pipe – Post Installation Inspection Demonstration

Since August 2010, VDOT construction contracts have been requiring post-installation inspection of culvert and storm drain. This bid item in the contracts is due to the VDOT Road & Bridge Specification Section 302.03(d) which was introduced at that time. Virginia Test Method (VTM)-123 is also to be followed in performing the inspection. The purpose of the inspection is to help ensure quality installation of the pipe-backfill system. The inspection is required on 100% of storm drains (inlet to inlet) and 10% of each type and size of culvert (pipe open at both ends) on the job.

*Invitation to attend:*

**Concrete Pipe - Post Installation Inspection Demonstration**

*Date:*

**May 23, 2011**

**Beginning at 1:30 PM**

*Location:*

**Hanson Pipe & Precast  
Manassas Pipe Plant  
7816 Bethlehem Road  
Manassas, VA 20109**

**Post Installation Inspection equipment including:  
CCTV and Laser Micrometer Technology  
Live demo inspection of pipe joints, crack measurement and evaluation**
