

### **Route 680 (Pole Bridge Road) bridges over Pole Bridge Creek in Patrick County**

A contract to replace four different bridges in Patrick County has been awarded. The contractor will perform the work sometime between spring 2015 and fall 2016.

Two of these bridges are located on Route 680 (Pole Bridge Road) and both bridges cross Pole Bridge Creek.

The bridges are located about 0.1 mile apart, about 1.8 miles from Route 680's intersection with Route 687 (Microfilm Road) and 3.5 miles from Route 57 (Fairystone Park Highway).

Each bridge replacement will require a closure of 5 consecutive days. Traffic will be detoured onto Microfilm Road and Route 57 during the closures. The detour length is about 17.8 miles.

The exact dates of the closures have not been determined. However, one is tentatively scheduled for September 2015 and the other for October 2015.

Additional signage will be installed on the bridge two weeks before the closure occurs.
